

### Basic Overview of Kickball Field Positions

Kickball is played on a baseball diamond, normally with 11 players fielding. Diagram and description of the responsibilities for each player are listed below

**Left Center:** Cover deep kicks. Be ready to get overthrows to **Second Base**.

**Right Center:** Cover deep kicks. Be ready to get overthrows to **Second Base**.

**Short Field:** Cover **Second Base** unless the **Pitcher** indicates otherwise. Be ready to back up for a power kick.

**Left Field:** Charge in to back up **Third Base** and cover the base. Be ready for overthrows to third, fouls and short kicks to the left.

**Right Field:** Charge to back up **First Base** and get any overthrows to first. Be ready for fouls and short kicks to the right.

**Short Stop:** Stop the ball and get it to the base at play. Be ready to cover **Second Base** if **Short Field** has to leave the base.

**Second Base:** Play opposite of short stop for additional bunt protection. Back up **First Base** and be ready to cover **Second Base** if **Short Field** has to leave the base. Stay on **Second Base** if a big kick is expected and have **Short Field** move back.

**Pitcher:** Check the field to make sure everyone is ready to play. Stay on the mound to end the play as soon as possible. Cover **Home Base** if the **Catcher** has to run out for a short bunt.

**Third Base:** Charge the short and longer bunts. Left Field or Short Stop will cover the base if you have to run off of it.

**First Base:** Stay planted on the base. **Second Base** and **Right Field** will get the overthrows to you.

**Catcher:** Charge the short bunts, be on the kickers ass.

**Remember:**

- Get the ball back to the pitcher
- Call your catches
- Tell your teammates where to throw the ball
- If you are on base, make sure you are focusing on the first/third base coaches
